PROJECTS

Emotionally independent music recommendation system

Dec 2023 - Jan 2024

Unlike traditional platforms, our system offers personalized music suggestions solely based on your unique musical preferences. By focusing solely on your taste in music, we ensure that every recommendation is tailored to your individual likes and dislikes, fostering a diverse and enriching listening experience. Say goodbye to mood-based playlists and hello to a truly personalized music journey.

Parkinsons disease Detection

Mar 2024 - Present

Leveraging advanced algorithms, we've developed a cutting-edge system capable of accurately identifying Parkinson's disease based on key biomarkers and patient data. Our innovative approach aims to streamline diagnosis, enabling early intervention and improving patient outcomes. With this technology, we're empowering healthcare professionals with a powerful tool to detect Parkinson's disease swiftly and accurately.
